Green Site

- Trees & plants grow on stream banks.
- Leaves fall into stream and provide food.
- Shade from trees keeps water cool.
- Roots make stream banks strong.

Yellow Site

- Trees are cut down.
- Sunlight warms water.
- No leaves in stream for food.
- Fertilizer washes into stream when it rains.
- Cows crush stream banks.
- Soil & animal waste washes into streams.

Blue Site

- No plants or trees on stream banks.
- Buildings, factories and highways.
- Concrete-sided waterways.
- Underground pipes divert water to factories and return to stream at a different temperature or polluted.
- Trash, pet waste, and oil flow into storm drains during rains.
